AGENT RUNTIME

Any Agent
Reference CLI included
User input · sessions · tools

BCG Context Manager BCG mode
Initial user input remains visible
Recent completed turns remain raw
Evicted turns → belief memory

Model + Tools
OpenAI-compatible inference
Search · shell · files · extensions

evicted completed turns

GRAPH SNAPSHOT
beliefs · relations · confidence

INTEGRATION PATHS

Graph Construction HTTP Service
Ordered streaming session per problem_id
/turns · /graph · /finalize · /release

Python SDK
BCGRunner — session orchestration
BCGMemory — observe, search, context

Construction Registry
shared contracts · config · persistence

GRAPH ENGINE

Configurable Graph LLM
Extract beliefs, decisions, entities, stances, evidence, and typed relations
Bounded history · merge verification · confidence propagation · persistent artifacts

INCREMENTAL BELIEF GRAPH PIPELINE

1 · Split / chunk role-tagged turn → **2 · Extract** beliefs + evidence → **3 · Merge** canonical nodes → **4 · Link** typed relations → **5 · Confidence** deterministic posterior → **6 · Snapshot** graph + artifacts
